

AIR QUALITY ENGINEERING

The downdraft table with no downsides. **Grindmaster 1250**

What makes the Grindmaster 1250 superior in every way to all other downdraft tables? You'll find the answer beneath its 16-gauge powder coated exterior.

- **Two motor filtration system**
- **Long life, high efficiency, cartridge filter**
- **Self cleaning design**
- **Meets ACGIH recommended sizing**

These features equate to less downtime, less expense and enhanced productivity. Sure, you could spend a little less on other downdraft tables. But in the end, they'll only end up costing you more. Make the smart choice. Choose Grindmaster 1250.

DIMENSIONS: 34"W x 54"H x 26.5"D
WEIGHT: 210 lbs. Installed
CABINET: 14 and 16-gauge with powder coated finish
WORK SURFACE: 12 gauge galvanized metal
POWER: 110 volt, 1 phase (9.5 amps)
CASTERS: 5" locking design
SHIELDS: 16 gauge galvanized metal
MOTOR BLOWER: 1.5 HP backward inclined motorized impeller
PRIMARY FILTER: 99.8% efficient cartridge filter
FILTER ACCESS: Front load with hinged door
WARRANTY: 3-year parts
VIBRATION MOTOR: Heavy duty, water tight, 85 pounds of shaking force

ADVANTAGES

TWO MOTORS ARE BETTER THAN ONE

One motor drives a fan to create suction, while a second motor vibrates the cartridge filter for optimum performance and self-cleaning purposes.

MORE MEDIA MEANS BETTER FILTRATION

Each Grindmaster 1250 cartridge filter features 80-square feet of media — among the most in the industry.

FEWER FILTER CHANGE OUTS

The Grindmaster 1250 cartridge filter can last two years or more without maintenance or changing.

TAKING CARE OF THE LITTLE THINGS

Not only longer lasting, the Grindmaster 1250 cartridge filter is also more effective, capturing 99.8% of particulates 0.5 microns or larger.
